1.6 Notes

- **"Y"** = available directly from the data source.
- **"Compute"** = the raw data is available but the indicator must be calculated.
- **"—"** = not available from that source.
- OpenAlex is the only fully free and open source in this table. Web of Science and Scopus require institutional subscriptions. Dimensions offers a free tier with limited functionality.
- Field normalisation always requires reference values. When a source does not provide them natively, you can compute them from the full corpus using the method in Chapter 13.
